Short Description

Join my 12 Month membership program and train yourself to train your horse to be a better combination.

This is not a dressage or jumping or horsemanship course. This is all about the rider and how you train yourself to ride using your core for balance, strength stability, and symmetry.

As a Physiotherapist, a retired elite rider, and knowledge on up to date sports physio research and equine biomechanics I am able to provide so much more than a rider exercise program.
